

- A flowchart is a graphical representation of an algorithm or a problem-solving process. The visualization of algorithms helps external people understand how your program will work.
- First, we begin with the start's oval. Then, you follow the arrows as you check the true/false diamond statements based on the data.
- The flowchart to the left represents a simplified version of a program for a robotic trash can. This is a visual method to understand the decisions the robot will make.
